Who we are?

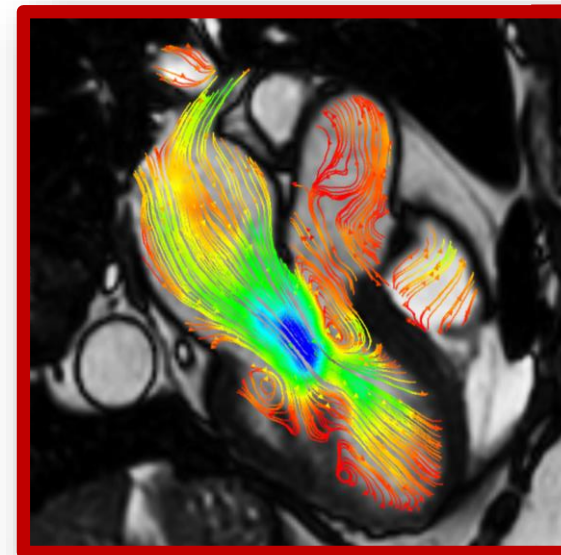

- Norfolk Heart Trust is one of the largest charities fighting heart disease in the region.
- We work in collaboration with local Hospitals to fight heart disease.
- If you, a member of your family or a friend have been treated for heart disease at the Norfolk and Norwich University Hospital, there is a good chance that the equipment has been donated by the Norfolk Heart Trust.

Norfolk Heart Trust is a part of
Norfolk Community Foundation
Registered Charity No.1110817

Miracle Magnets for HEART (MM4H)

**Fund Raising Appeal
For a Heart MRI**

What is heart MRI?

- Heart MRI is a safe non-invasive test
- Heart MRI scans allows doctors new ways to diagnose heart disease more accurately
- It also allows to monitor heart disease precisely
- Heart MRI scans allows doctors to test new treatments in research

“A Heart MRI saves lives and prevents unnecessary invasive assessments”

There is a need for a heart MRI in Norfolk region

- Our regional hospitals lack capacity for heart MRI
- Patients have to travel long distances for scans
- There is a long waiting list
- Heart MRI also allows research in heart disease – lack of which is prohibitive for any progress in treating heart disease

Key aims of MM4H

- Improve patient care
- Early diagnosis of heart disease to save lives
- Improve training and education
- Active involvement in innovative research to fight heart disease

“We hope to raise £1.5 million for our mission”

MM4H Proposal

- A dedicated state-of-the-art heart MRI system
- Cutting-edge software solutions to support diagnosis and treatment
- Advanced information technology solutions to support research and training
